

AGILITY™ Leak Test Solutions
Vacuum Helium Leak Test
Simplified Flow Chart

AGILITY™ control software is designed for flexibility and performance in vacuum helium leak testing applications. The software is configurable to test both sealed and open style parts with automated or manual actuated test fixtures. For open style parts there are several options for the helium fill sequence and gross leak test functions. Timers and limits are also user-definable in simple recipe formats to accommodate parts of all sizes.

Optional Steps
