

LACO TECHNOLOGIES

HELIUM SPRAY PROBES

Rugged and easy to use, LACO's Helium Spray Probes are designed for use in maintenance or production leak detection applications. Our helium spray probes include up to 10 Ft. of poly hose with a long stainless steel flexible probe and are shipped in a durable storage case. Our Mini Pen Style Helium Spray Probe with adjustable needle valve features a refillable reservoir for convenient transportation to any location without taking a helium bottle. All spray probes are compatible with an optional helium regulator for immediate connection to your helium bottle.

LHSP01 and LHSP04 requires regulated helium at low pressures (see LHREG-01). LHSP05 requires regulated helium at tank for refilling small reservoir (see LHREG-01).

HELIUM SPRAY PROBES SPECIFICATIONS

COMPONENT	DESCRIPTION		
PART NUMBER	LHSP01	LHSP04	LHSP05
DESCRIPTION	Helium Spray Probe Gun	Helium Spray Probe Gun with Regulator	Mini Pen Style Helium Spray Probe
HOSE	10 Ft. poly hose with 1/4" NPT hose end	10 Ft. poly hose with 1/4" NPT hose end	6 Ft. poly hose and 1 Ft. refill adapter with 1/4" NPT hose end
PROBE	8" long flexible probe	8" long flexible probe	8" rigid pencil probe
PROBE TIP	1/8" dia. x 2" long rigid SS	1/8" dia. x 2" long rigid SS	1/16" x 4" long rigid SS
APPLICATIONS	Maintenance or production leak detection applications.	Maintenance or production leak detection applications. Allows helium adjustment flow at point of use.	200 cc helium refillable reservoir with gauge is ideal for use in mobile or remote applications.

LHREG01 SPECIFICATIONS

COMPONENT	DESCRIPTION
PART NUMBER	LHREG-01
DESCRIPTION	Helium Regulator
MATERIAL	Brass
RANGE	0-100 psi outlet
CONNECTION	CGA 580 connection to bottle
OUTLET	1/4" NPT
APPLICATION	For use with LHSP01, LHSP04, or to refill LHSP05
