LACO DIGITAL CONTROL PENDANT

LMSA101496

The LACO Digital Control Pendant is a smart and economical alternative to existing Alcatel 180T analog pendants. More powerful and durable than its analog counterpart, the LACO digital pendant features a dynamic digital display of leak rate and inlet pressure, stainless steel post with magnetic backed display, holder, and pendant cable.

FEATURES

- Digital readout displays leak rate in either atm-cc/sec or mbarliter/sec and the inlet pressure in Torr or mbar.
- Overall leak detector status and filament state are displayed.
- Display also features a dynamic digital graph of the leak rate over nine decades.
- Includes stainless steel post, stand display holder, and pendant cable.
- Includes a magnetic-backing for mounting on the stand holder or other metal surfaces.

For use on leak detector models:

- ASM 180T
- ASM 180TD+
- ASM 181T
- ASM 181T2
- ASM 181TD+
- ASM 181T2D+

BENEFITS

- No confusion over reading analog logarithmic displays of leak rate.
- Digital graph provides a highly visible indication of the changing leak rate.
- Avoid breakage and expensive repairs of glass displays in the analog versions
- Leak detector status is clearly displayed, (i.e. Autocal, Stand-By, Pump Down, Fine Test, Gross Test)
- Magnetic backed pendant can mount onto any metallic surface.
- Longer-life cycle on/off push buttons compared to traditional membrane switches.
- Pendant displays leak rate units in either atm-cc/sec or mbarliter/sec and pressure units in Torr or mbar.
- Cost savings of \$1000 or more when compared to OEM analog pendant.
