GENERAL TROUBLE SHOOTING GUIDE

OPERATIONS

INTERVALS MAINTENANCE

USING THE DETECTOR (SNIFFER TEST MODE)

1. Press the key.
2. Connect the part to be tested.
3. Start the detector test.
4. The alarm should be heard.
5. The alarm should be heard.

USING THE DETECTOR (VACUUM TEST MODE)

1. Press the key.
2. Connect the part to be tested.
3. Start the detector test.
4. The alarm should be heard.
5. The alarm should be heard.

ADJUST THE SNIFFER SENSITIVITY

1. Press the key.
2. Connect the part to be tested.
3. Start the detector test.
4. The alarm should be heard.
5. The alarm should be heard.

ADJUST THE VACUUM SENSITIVITY

1. Press the key.
2. Connect the part to be tested.
3. Start the detector test.
4. The alarm should be heard.
5. The alarm should be heard.

RECORD THE SIGNAL

1. Press the key.
2. Connect the part to be tested.
3. Start the detector test.
4. The alarm should be heard.
5. The alarm should be heard.
